LIVE WELL SAN DIEGO REGIONAL RESULTS SUMMARY | 2013 - 2018

NORTH CENTRAL REGION - COMMUNITY LEADERSHIP TEAM

INTRODUCTION

Live Well San Diego Community Leadership Teams connect the collective efforts of community groups in each region across San Diego County. They provide a central point for planning and organizing collaborative action for community change. Working together allows for planning and implementation of innovative and creative projects aimed at achieving the Live Well San Diego vision of a region that is Building Better Health, Living Safely and Thriving.

Formed in June 2012, the North Central Community Leadership Team has helped to assess, develop and guide priorities and activities that improve well-being in the region using data-informed strategies. Through an initial Community Health Assessment and the active development of a Community Health Improvement Plan, now Community Enrichment Plan, the North Central Community Leadership Team has evolved to address all aspects of health and well-being.

The North Central Community Leadership Team consists of many County and community partners, as well as community clinics. With a focus on three priority areas, the North Central Community Leadership Team utilizes social media to spread awareness, art to improve pedestrian safety in busy intersections, and educates residents on the appropriate use of available health care services. Three work groups drive the activity in each of the three priority areas below.

PRIORITY AREAS

BUILDING BETTER HEALTH
• Increase physical activity
• Improve healthy eating and nutrition
• Improve behavioral health
• Improve access to care and prevention
• Reduce chronic disease

LIVING SAFELY
• Reduce drug and underage alcohol use
• Ensure local systems are trauma informed

THRIVING
• Improve child, youth and family wellness and resiliency
• Improve active transportation and access to park and community spaces

PARTNERSHIPS

Community partners are committed to advancing the Live Well San Diego vision of a region that is Building Better Health, Living Safely and Thriving. Working together under the direction of the Regional Community Leadership Teams, individuals and organizations are driving meaningful and sustainable improvement in the lives of San Diego County residents. Several efforts from the 2013-18 Community Health Improvement Plan are highlighted here, with data on progress achieved and the research that explains why these activities contribute to positive community change.

**Eliminating Stigma Around Mental Health**

According to the National Institute of Mental Health, about one in five adults live with a mental illness, varying in degree of severity from mild to severe. Children and adolescents also suffer from mental illness. Despite how common it is, stigma remains a barrier to individuals seeking help. This is why campaigns to eliminate stigma associated with mental health and substance use problems have been a focus of public awareness campaigns. The North Central Community Leadership Team is interested in increasing access to mental health resources in the region and decreasing stigma to encourage those who need help to seek it.

**Progress Made**

- Since 2014, a total of 321 suicide prevention trainings were convened, reaching 6,700 people across the county provided by the Community Health Improvement Partners.
- Mental Health First Aid trainings conducted by Urban Corps were made available to help community members learn how to identify those who may need mental health assistance.
- The percent of adults in North Central Region who self-reported they needed help and received treatment for mental health or substance use issues appears to be increasing—from 65% in 2012 to 84% in 2016 (19 percentage points).

**Key Partners Involved:** Community Health Improvement Partners, Urban Corps of San Diego

**Traffic Calming and Place Making With Intersection Murals**

Intersection murals are unique traffic calming mechanisms that serve to beautify a community, build community empowerment, and create safer environments for pedestrians. The Bayside Community Center’s Resident Leadership Academy conducted a walk audit in the Linda Vista community, discovering that residents were very concerned about a dangerous intersection near Montgomery Middle School where cars were often speeding and accidents had occurred. The North Central Community Leadership Team provided support throughout the mural project.

**Progress Made**

- The Bayside Community Center RLA led community engagement efforts to plan, design and create the mural over a 2 ½ year period.
- Interactive visioning workshops were held with the community to determine the overall mural design along with input from local artists.
- The project was approved by the City of San Diego Arts and Culture Commission, and a $1,500 grant was awarded by the San Diego Association of Governments’ (SANDAG) Walk Ride and Roll Program to the Bayside Community Center to fund the installation of the mural.

**Key Partners Involved:** Linda Vista Intersection Mural Network, Montgomery Middle School, Bayside Community Center Resident Leadership Academy, City of San Diego Arts and Culture Commission, SANDAG
Outreach Campaigns Promoting Healthy Behaviors

Outreach campaigns are an important way to raise awareness and create behavior change. The North Central Community Leadership Team engaged in several campaigns to address priority concerns, including the misuse of emergency rooms for routine medical care and encouraging healthy eating and physical activity through the 5-2-1-0 Every Day! Campaign.

Progress Made

- Over 6,000 people received the “Where Should I Go?” brochure which provides information on where to go for health care, when the emergency room is appropriate to use and when it is not.
- Over 20 health care partners in the North Central Region promoted healthy eating and physical activity using 5-2-1-0 Every Day! Campaign materials.
- Nearly 1,000 Intimate Partner Violence resources were distributed to Sweetwater, San Diego, and Grossmont School Districts and Family Resource Centers in the region.
- 10 additional campaigns were launched over the past few years that addressed such public concerns as food insecurity, child sexual abuse, family health and fitness, and domestic violence, breast cancer and diabetes awareness.

Measuring Progress: 3-4-50

While Live Well San Diego has expanded far beyond a chronic disease prevention strategy, 3-4-50 remains an important way the County measures its progress. 3-4-50 refers to three behaviors (poor diet, physical inactivity, tobacco use) contributing to four diseases (cancer, heart disease and stroke, type II diabetes and lung disease) leading to more than 50% of all deaths in San Diego County.

Overall in San Diego County and in North Central, deaths due to chronic diseases are trending downward. In San Diego County, the percentage of deaths due to chronic disease has declined from 63% in 2000 to 53% in 2016. In North Central Region, the percentage dropped from 63% in 2000 to 51% in 2016.
