To Whom It May Concern,

Rooted in Place Landscape Architecture and Consulting is pleased to partner with the County of San Diego’s Live Well San Diego. Since its inception in 2012, Rooted in Place has worked with numerous educational and community based organizations to create holistic and healthy outdoor environments. The intent of each of our projects is to celebrate local history, culture, and ecology while engaging community members in our design and build process from conception to construction. Our endeavors relate well with those of Live Well San Diego, focusing on creating “healthy, safe, and thriving communities in San Diego”.

As leaders in the local and national Children and Nature Movement, Rooted in Place specializes in creating neighborhood public spaces for children of all ages to play, learn, and develop a healthy relationship with nature. Rooted in Place advocates for change both personally and professionally, using employee knowledge and experience to educate and inspire others. We volunteer in our local communities, are trained in community facilitation, and advocate for change and empowerment of others. As Landscape Architects, we interface with the built environment in all our projects, partnering and collaborating with public agencies and the private sector to create dynamic, beautiful, and ecologically sustainable outdoor environments. We see tremendous potential in partnering with Live Well San Diego and its partners to implement innovative programs, projects, and policies that support healthy and safe communities to thrive for generations to come.

Through our work and collaboration with Live Well San Diego and their partners, Rooted in Place will continue acting as a leader in community engagement and empowerment, providing people with the tools they need to be advocates for their own communities. We are committed to promoting ecological education, responsibility, and accountability by emphasizing people’s roles in both the built and natural worlds. Being a partner with Live Well San Diego allows us to enhance both Rooted in Place and Live Well San Diego’s mission to create healthy, safe, and thriving public spaces to enrich the lives of myriad San Diego communities.

Sincerely,

Ilisa Goldman
