

Good mental health starts with you. How are you feeling?

CHECK YOUR MOOD

Self-Assessment

Everyone experiences stress, sadness and anxiety from time to time – it's a normal part of life. However, if you are feeling overwhelmed, depressed, or unable to do the things you once enjoyed, it may be time to speak with a professional and assess your emotional health. Answering the questions below is a quick and easy way to evaluate whether or not you are experiencing normal levels of stress.

Over the last two weeks, how often have you been bothered by any of the following problems?

(For each line, use "✓" to indicate your answer)

	Not at all (0)	Several Days (1)	More than half the days (2)	Nearly every day (3)
Little interest or pleasure in doing things	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Feeling down, depressed or hopeless	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Add your totals from each column together to obtain your total score!

_____ + _____ + _____ + _____
= **Total Score:** _____

What Your Score Means

This self-assessment is **not** a diagnostic tool; however, it is a great way to help monitor your mood and overall emotional well-being. It is recommended that individuals over 18 years old with a total score of '4' or higher complete the full version of this screening tool to determine whether or not they are experiencing symptoms consistent with depression.

To access the full version of this screening tool, visit: www.CheckYourMoodSD.org

Recognize the Difference

Everyone experiences stress, sadness and anxiety from time to time – it's a normal part of life. However, if you are feeling overwhelmed, depressed, or unable to do the things you once enjoyed, it may be time to speak with a professional and assess your emotional health.

What are the common signs of depression?

- Persistent sad, anxious, or "empty" mood
- Difficulty falling asleep or staying asleep, or sleeping more than usual
- Reduced or increased appetite
- Unintended weight gain or loss
- Loss of pleasure and interest in once-enjoyable activities
- Restlessness
- Irritability
- Difficulty concentrating at work or school, or difficulty remembering things or making decisions
- Fatigue or loss of energy
- Feeling guilty, hopeless or worthless
- Thoughts of suicide or death
