SAN DIEGO
MEDICAL UPDATES

JENNIFER TUTEUR, MD
DEPUTY CHIEF MEDICAL OFFICER
COUNTY OF SAN DIEGO
Give Your Immunity A Boost!

- Even if you had COVID-19 and/or received treatment for COVID-19 in the past, the **bivalent COVID-19 vaccine is recommended**!

- Studies show the **updated booster provides additional protection against developing severe COVID-19 in the future**.

The stronger, most protective **booster** is available for those ages 5 and up who have completed their initial vaccine series.

MyTurn.ca.gov
On 10/12, CDPH expanded the emergency use authorization of the Moderna and Pfizer bivalent boosters.

- **Moderna**: Everyone **6 years** and older should get the updated booster at least 2 months after the previous COVID-19 vaccine or booster dose.

- **Pfizer**: Everyone **5 years** and older should get the updated booster at least 2 months after the previous COVID-19 vaccine or booster dose.

### COVID-19 Vaccine Timing

</tr>
</tbody>
</table>

*Bivalent Booster:* Pfizer: Ages 5-11, Pfizer: Ages 12+, Moderna: Ages 6+

(For people who previously received a monovalent booster dose(s), the bivalent booster is administered at least 2 months after the last monovalent booster dose.)

(Monovalent Booster Novavax: Ages 18+
For people who have not received any booster doses and are unable or unwilling to receive bivalent vaccine, monovalent Novavax vaccine may be administered as a single booster dose at least 6 months after completion of the primary series.)
IMPORTANCE OF FALL BOOSTER CAMPAIGN

Fall COVID Booster Campaign to Save Thousands of Lives

Projected Seven-Day Rolling Average of COVID-19 Hospitalizations and Deaths in the U.S., Under Different Booster Vaccination Coverage Scenarios

Note: In the baseline scenario, vaccination rates are held constant at the average of the daily vaccination rate for August 2022 until the end of March 2023. Data: Authors' analysis.

COVID-19 in San Diego County: Data Dashboards

**Highlights**

The Highlights dashboard is updated on Thursdays.

COVID-19 Community Levels

Levels represent COVID-19 hospitalizations, intensive care unit staffing, and COVID-19 case rates. Reflects how your community will be impacted by COVID-19.

Community Levels of Transmission

Levels represent COVID-19 transmission and cases in the county. Reflects your risk of getting COVID-19.
Take Control! Make a Plan!

Make a plan NOW for what you and your family would do if someone develops COVID-19.
COVID-19 Treatment

• Act quickly- if you have symptoms, get tested and seek treatment ASAP

• Treatment is safe and effective. Can reduce the risk of hospitalization and death by 88%

• The majority of adults are eligible for treatment

• Treatment is available for children who are at high risk of developing severe COVID

Contact your healthcare provider to discuss treatment options for COVID-19

---

**Notes:**
- Test to Treat
- Monoclonal Antibody
The new San Diego County Respiratory Virus Surveillance Report provides a detailed snapshot of common respiratory illness activity in the region.

**San Diego County Respiratory Virus Surveillance Report**
Prepared by Epidemiology and Immunization Services Branch

[www.sdepi.org](http://www.sdepi.org)

**October 27, 2022**

**COVID-19**
- Cases: 88,207
- Deaths: 131
- Outbreaks*: 132

**Influenza**
- Cases: 2,528
- Deaths: 1
- Outbreaks*: 0

*In residential congregate settings

Sign up for weekly updates or access the report on the HHSA website.
Can you get the flu shot and COVID-19 booster at the same time?
Cumulative Influenza Cases

Figure 3.2. Cumulative *Influenza* Cases by CDC Episode Week* and Fiscal Year

*Episode date is the earliest available of symptom onset date, specimen collection date, date of death, date reported.

Data through 10/22/2022
IF THERE IS ONE THING TO REMEMBER....

GET YOUR FLU VACCINE....

....NOW!
REMINDER!

Even though MPX cases are decreasing in San Diego County, **do not wait to get your second MPX vaccine!**

You need both vaccines for them to be fully effective, and to protect yourself now and in the future.
If you have a reaction to the COVID-19 booster, is it recommended to space out the flu and COVID-19 booster shots?

What is the “tripledeemic” that has been in the news lately?
