

# Southeastern Live Well Center

## ABOUT THE SOUTHEASTERN LIVE WELL CENTER (SELWC)

The County of San Diego plays a critical role in providing a variety of health and community services to promote the well-being of residents. The new Southeastern Live Well Center will provide a single stop for residents to get these services in a convenient and modern location. It will also serve as a hub for community meetings, educational opportunities, and workforce training. We are working closely with the community to develop the project, and your input is welcome.

The County broke ground on the new SELWC in October 2021. It is scheduled to be completed in the Summer of 2023.

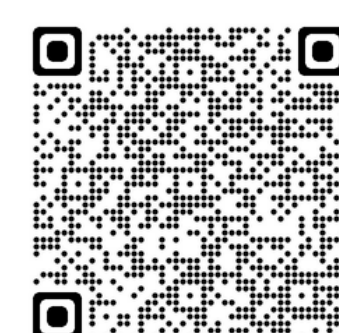

With input from community members and stakeholders, the SELWC's design will include a wellness and meditation garden, an outdoor area for a coffee cart, a play area for children and families, local art representing the history and culture of San Diego and more!

Using a community-centered approach, the County hired local subcontractors to build the SELWC.

The Center will provide various services including public health and behavioral health services. Additional services include: family strengthening services, military and veteran services, workforce development and more!
