From Harm to Healing
Teaching the Skill Sets of Accountability and Forgiveness
A community meeting with Lauren Trout from WestEd

Free! January 26, 2026 at 3:30 pm PT / 6:30pm ET on Zoom
Scan or head to bit.ly/harm2healing to register.

Register to join this interactive session that explores accountability and forgiveness through a restorative lens. Designed for educators, this free community meeting offers practical skills to move beyond blame, support healing and repair, and strengthen relationships in schools and communities.

Friday, January 26 at 3:30 PM

From Harm to Healing: Teaching the Skills Sets of Accountability and Forgiveness

THANK YOU FOR YOUR INPUT!

How you prefer to engage with us in 2026:

- Virtual telebriefings
- E-newsletters
- Occasional in-person events

Topics you want to see prioritized:

- Health updates (e.g., immunizations, infectious diseases, outbreaks)
- Community and family resources (e.g., food, housing)
- Mental health (e.g., bullying, suicide prevention)
- Student and family wellness (e.g., substance use, physical activity, sexual health)
- Laws and policies affecting schools

Substance Use and Misuse Trends in Adolescents

K-12 Telebriefing

Jim Crittenden, ATOD Prevention Coordinator, San Diego County Office of Education

January 6, 2026

Current Use Trends

- Number of students reporting any drug use is declining
- Students that do use, appear to be using more frequently
 - More socially acceptable
- Alcohol is still the most abused substance by teens
- Substances are much more potent and dangerous
 - High potency THC and Fentanyl
- More available
- Less expensive
- More socially acceptable and normalized than ever

Let's Talk Marijuana

Marijuana is Big Business

- California's adult-use retail market had its best year on record (netting more than \$5.2 billion in taxable sales) in 2021
 - According to year-end data released Feb. 23 by the state's Department of Tax and Fee Administration (CDTFA).
- CA is the largest legal marijuana market in the world

Not So Natural

- GMO created products
- High potency – colorful packaging
- Vape pods, stizzy pens, edibles, lotions

Low Potency Products are not A Popular Purchase Item

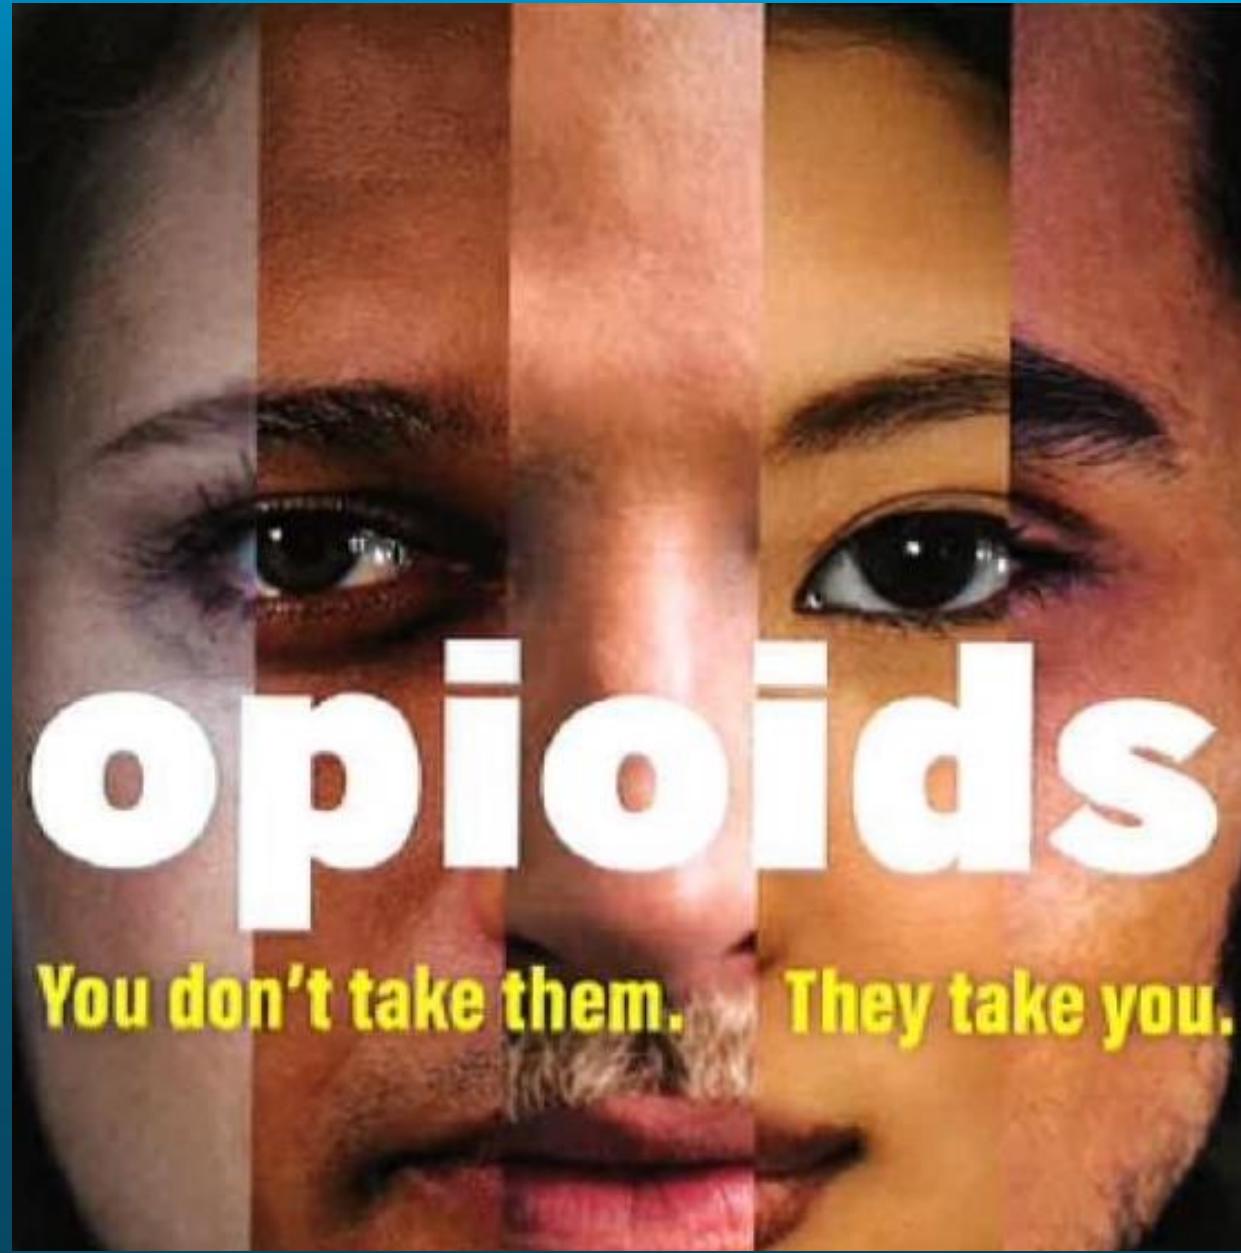

- Meeting with several marijuana outlet owners:
 - At our local marijuana storefront, 86% THC is the most popular item
 - Mostly oils, waxes, tinctures, lotions
 - Today's marijuana is up to 40x stronger than 20 years ago

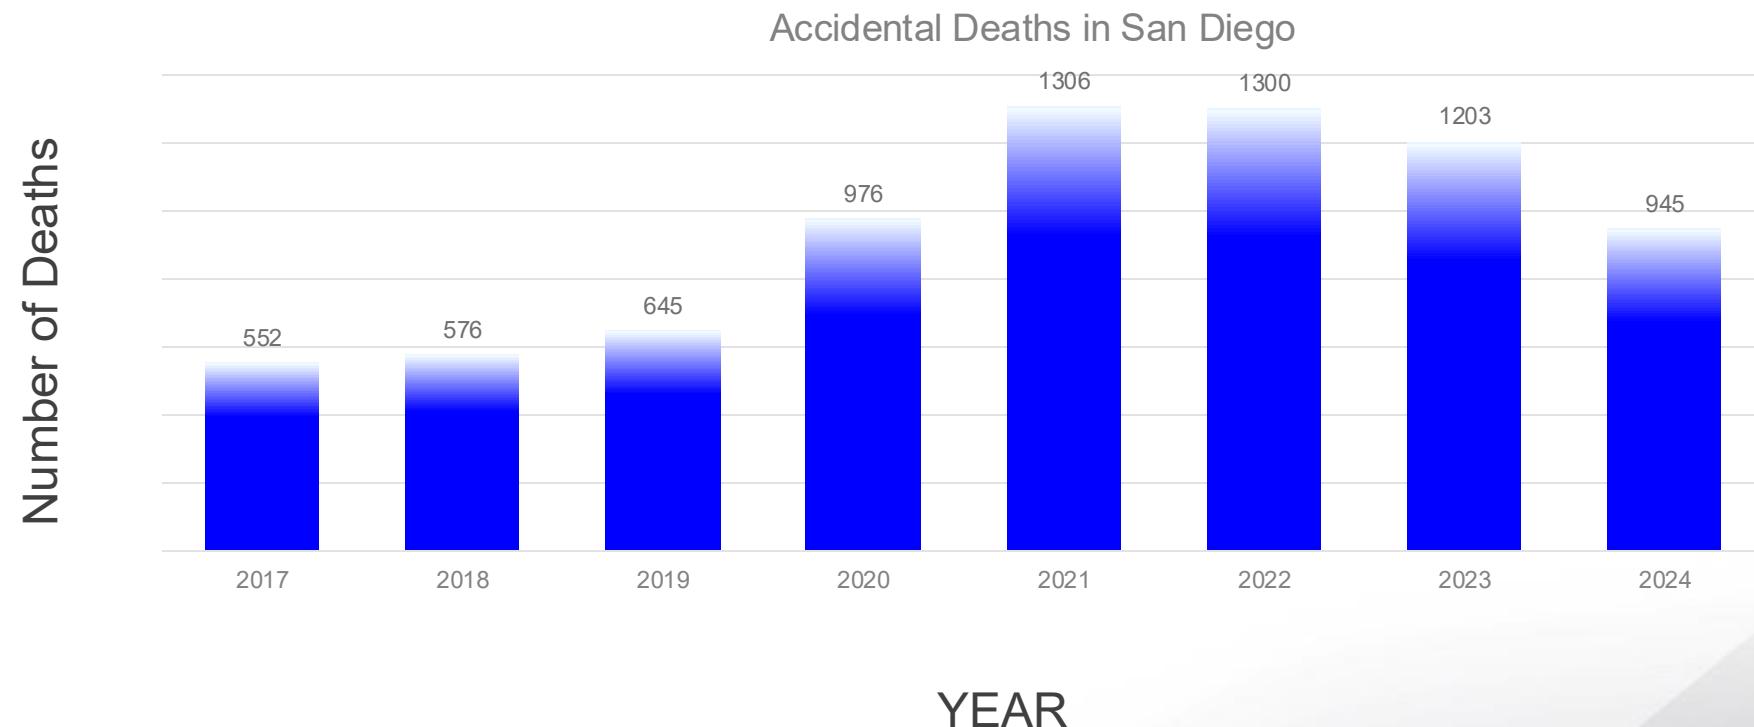

Edibles

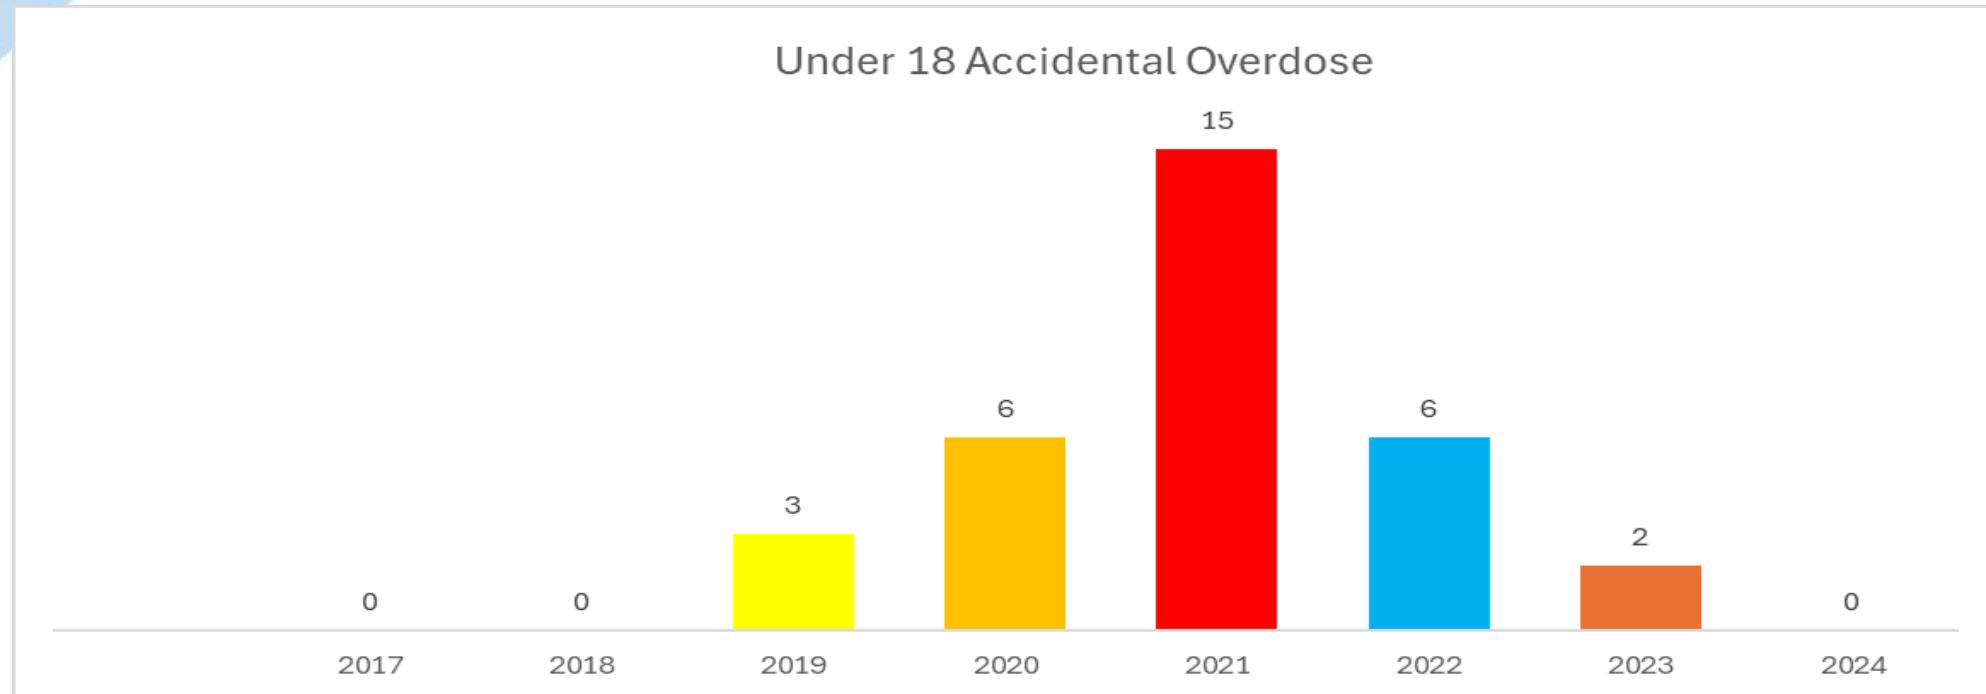

- Can take longer to feel the effects
- Can be more of a head high
- In some cases, users report highs from 8 hours to a day
- Can interacts with driving and prescription drugs

2024 Overdose Data

2024 Overdose Data

Fentanyl

Fatal dose of fentanyl
(2 mg or 2000 mcg)

Carfentanil

Fatal dose of carfentanil
(0.02 mg or 20 mcg)

These amounts will kill.

What they appear to be:

Vicodin

Oxycodone

Roxicodone

Xanax

Spice

What the DEA lab found:

Fentanyl

Fentanyl

SDCOE Prevention Efforts

- Project Alert
 - Contract with the County of San Diego Behavioral Health Services
 - Provides research validated prevention curriculum to grades 6 - 8
 - Nearly 13,000 students served in 2024-25 across 26 schools
 - Currently in 37 schools for 2025-26
- I Choose My Future
 - Assembly style presentations
 - 6 lesson video series
- Classroom Based Presentations
 - Cannabis/THC, Vaping, Alcohol, Opioids

SDCOE Prevention Efforts

- Friday Night Live is a statewide youth leadership development program that works with young people to be active leaders in their school/community.
 - Asset building approach that purposely seeks to meet youth needs and build youth competencies relevant to enabling them to become successful adults.
 - Youth are not recipients but **Resources & Partners**.
 - Not focusing on the problem, but build young people's assets so they can navigate through problems & issues life may bring.

CHILDHOOD VACCINE SCHEDULE

- On Monday, January 5, the CDC announced an updated childhood vaccine schedule that recommends 11 vaccines, compared with the 18 previously included on the schedule.
 - This decision was based on a brief review of other countries' practices, and not the typical evidence-based review and recommendation process.
- CDPH and the County of San Diego have been following recommendations made by the West Coast Health Alliance.

LIVE WELL
SAN DIEGO

From the President

American Academy of Pediatrics
DEDICATED TO THE HEALTH OF ALL CHILDREN®

Press Statement by Andrew D. Racine, MD, PhD, FAAP, AAP President:

January 5, 2026

AAP Opposes Federal Health Officials' Unprecedented Move to Remove Universal Childhood Immunization Recommendations

"Today's announcement by federal health officials to arbitrarily stop recommending numerous routine childhood immunizations is dangerous and unnecessary. The longstanding, evidence-based approach that has guided the U.S. immunization review and recommendation process remains the best way to keep children healthy and protect against health complications and hospitalizations."

IMMUNIZATION RECOMMENDATIONS

- AB 144, signed on 9/17/25, establishes CDPH as the source for immunization recommendations and preventive services guidelines for the state program
- In collaboration with the West Coast Health Alliance
- Beginning Jan 1 2025, CDPH will make vaccine recommendations based on guidance from professional organizations:
 - American Academy of Pediatrics (AAP)
 - American Academy of Family Physicians (AAFP)
 - American College of Obstetricians and Gynecologists (ACOG)

[Frequently Asked Questions about Respiratory Virus Vaccines](#)

[County Public Health Services Page](#)
[- Vaccine Recommendations](#)

HEPATITIS B VACCINE

- In alignment with the [California Department of Public Health and the West Coast Health Alliance](#), County public health officials continue to recommend hepatitis B virus (HBV) immunization be given within 24 hours of birth.
- Hepatitis B is a highly infectious virus that attacks the liver and can cause serious illness and death.
- The hepatitis B vaccination is an effective way to prevent infection and its complications.

[County News Center: County Public Health Officials Recommend Hepatitis B Vaccine for Newborns](#)

VACCINE GUIDANCE & AUTISM

- County of San Diego Public Health Services has posted guidance on its immunization website that vaccines are not linked to autism.
- The information on the County's [Getting Your Vaccines](#) website is based on decades of studies cited by the [California Department of Public Health](#), the [American Academy of Pediatrics](#) (AAP), and other experts, and reflects high-quality evidence that vaccines are not linked to autism.
- Parents are encouraged to continue following the recommended vaccine schedule and talk with their child's healthcare provider if they have any questions.

[County News Center: County Posts](#)
[Autism Advisory Guidance](#)

ACETAMINOPHEN AND PREGNANCY

- Decades of research show that autism has complex causes, and that there is no strong evidence showing a causal relationship between the appropriate use of acetaminophen (Tylenol) during pregnancy and harmful effects on fetal development.
- Acetaminophen is one of the few options available to pregnant patients to treat pain and fever, which can be harmful to pregnant people when left untreated.

[California Issues Statement on Credible Medical Information Regarding Acetaminophen and Pregnancy](#)

FORMULA LINKED TO INFANT BOTULISM OUTBREAK

- County health officials have issued a second reminder about a nationwide outbreak of infant botulism linked to ByHeart Whole Nutrition Infant Formula.
- Parents and retailers are urged to dispose of all ByHeart formula products.
- Infant botulism is a rare but serious illness that primarily affects babies younger than 6 months.
- The outbreak has caused 37 cases across 17 states, including California. No cases have been reported in San Diego County.
